GAMME ANTIDÉFLAGRANT

Notre gamme antidéflagrante est réalisée en alliage Cuivre-Beryllium (Cu-Be).

UTILISATION

L'outillage Cuivre- Beryllium a pour particularité de ne pas générer d'étincelles, ce qui apporte une sécurité indispensable dans une atmosphère explosive (ATEX). En plus de cette propriété antidéflagrante, l'alliage Cuivre- Beryllium est également non-magnétique et résistant à la corrosion. Il est ainsi recherché dans les domaines suivants :

- Industrie pétrochimique, raffineries, conduits de gaz ou de pétrole, distribution de carburant
- Production et transport d'énergie électrique
- Industrie chimique
- Industrie pharmaceutique
- Industrie agroalimentaire : silos, moulins, distillerie, brasseries.
- Industrie du papier, du plastique, de peintures, de solvants
- Lutte contre les incendies
- Fabrication et stockage de poudre et d'explosifs
- Forage, mines
- Inspection de citernes, transport Hazmat
- Station d'épuration
- Industrie aérospatiale, aéroports
- Chemins de fer
- Industrie maritime et chantiers navaux
- Industrie automobile
- Imagerie médicale (IRM)...

RÉALISATION

- La nuance de l'alliage est **Cu-Be 25**, dont les propriétés de résistance sont supérieures aux autres nuances de Cuivre- Beryllium.
- **Sa qualité est strictement contrôlée** afin de garantir les propriétés anti-déflagrantes, mécaniques et de résistance à la corrosion de nos outils.
- **L'alliage est obtenu par coulé.** La majorité de nos outils font l'objet d'une forge qui augmente la densité de l'alliage de 30% et place la qualité de notre gamme parmi les meilleures du marché.
